- Using a computer every day can have more negative than positive effects on children. Do you agree or disagree?
- My favorite book (20 marks)

Q NO 3 Make the Precise of the given passage. Some of the things which science has given us have certainly helped make our lives happier. Science has helped us to get rid of many sicknesses of the body. That is a great thing. It is difficult to be happy if our body is full of pain. Scientists have made many discoveries which have helped to make painless, and to remove the causes of pain and sickness. By making it possible to cure terrible diseases-such as malaria, smallpox, plague, pneumonia and tuberculosis, science has made longer the life of the average man. Science is helping man to produce much more food from the earth. By this, it is helping to get rid of famine and to prevent sickness caused by not having enough food to eat. It has also made possible the sending of quick relief to places where there is shortage of food and medicines with the help of motor lorries, railway trains, ships and airplanes. That is also very good as many lives are saved in such way. There are also many discoveries of science which have definitely brought unhappiness into the world. But that is not because the discoveries are bad, but because men are using them badly. The scientists who invented the terrible weapons are not wicked men who enjoy killing. They are people with kind hearts. The same discoveries could be used for useful purposes, if the leaders did not allow them to be used for killing. Explosives are not harmful if they are used for such purposes as helping to get coal, metals and other materials out of the earth. The same motors and airplanes which are used to carry guns and drop bombs, can be very useful for good purposes. So we see that it is not the discoveries and inventions that are bad but the ways in which men use them. (20 marks)
